

GROUP LEADER POSITIONS

INSTITUT CURIE

Department of Cell Biology

(website: www.curie.fr/recherche/themes/detail_unites.cfm/lang/_fr/id/5.htm)

The Department of Cell Biology at Institut Curie (UMR CNRS 144/Institut Curie) in Paris is inviting applications for two group leader positions from individuals interested in basic aspects of organelle and cell morphogenesis, cell division cycle, cell polarity, cell migration and cell adhesion. For one position, we are particularly looking for candidates having experience and an outstanding record in cytoskeleton dynamics during the cell cycle.

Candidates interested in innovative approaches, and in particular physical approaches are welcome since Institut Curie is enforcing interdisciplinary projects between the Department of Cell Biology and the Department of Physical Chemistry. Any biological model system is acceptable, but applicants must have an interest in the implications of their findings in cancer research, the main mission of Institut Curie. Further information can be obtained from Bruno Goud, Head of the Department, at the address given below.

The positions should begin mid-2007. Please send your application, including CV, research plans, list of publications and selected reprints to:

Bruno Goud

UMR CNRS 144/Institut Curie

INSTITUT CURIE, 26 rue d'Ulm, 75248 Paris Cedex 05, France
